

## Joint Forces at it-sa 2022

**beyond SSL, Filecloud and ONLYOFFICE share their knowledge at booth 7A-125.**

Without a doubt, beyond SSL stands for secure and modern remote workplace solutions. After two years, the bavarian company will be back at it-sa expo in Nuremberg. After this forced break due to Covid, they will celebrate their comeback by bringing their partners Filecloud and ONLYOFFICE to their booth - for a maximum of workplace-power.

The working world has been turned upside down. In the last two years there has been a change of heart, which has been manifested in terms such as New Work and Modern Workplace. Enterprises and companies had to learn the hard way that the stationary workplace is not a prerequisite for sufficient

productivity and measurability of performance. Flexible workplaces characterize today's working world - and the technology follows people's ideas with innovative solutions to enable and support the new workplace models.

This is exactly where beyond SSL and its partners position themselves. The main focus is to offer solutions that are as flexible as possible. On the one hand, these should be able to be securely integrated into any existing infrastructure and, on the other, build a ZTNA-compliant bridge between various target systems and a wide variety of end devices. Different operating systems or the hardware properties of the devices should be irrelevant.

Whether it is just one-man company with one computer or an enterprise company with a multicloud, multi-VDI structure and high-end perimeter protection, a visit at booth 7A-125 by beyond SSL, Filecloud and ONLYOFFICE is a must for everyone.

**About beyond SSL GmbH**

beyond SSL focuses on consulting, marketing and sales of solutions related to connectivity, security and privacy. The company was founded by a team of specialists with many years of experience in various IT and management areas. In close cooperation with various product providers, currently RemoteSpark, TalariaX, FileCloud, ONLYOFFICE, and technology partners such as Fortinet, F5, Hillstone and Pulse Secure, beyond SSL and its partners support customers in all industries and of all sizes. We attach great importance to personal care and excellent support. Customers and partners benefit equally from a pre-selection of solutions with an excellent cost-benefit ratio.
