

beyond SSL and Hillstone form technology alliance

SparkView from beyond SSL delivers high-performance clientless remote access for Hillstone NGFW.

The firewall manufacturer Hillstone Networks, highly acclaimed in the Gartner Peer Insights “Voice of the Customer”, has concluded a technology alliance with beyond SSL. Hillstone NGFW and Sparkview are now delivering a perfectly coordinated all-in-one solution for secure and modern work environments, entirely based on the Zero Trust Network Access (ZTNA) approach.

Security, reliability, performance and compatibility are among the most important properties that an IT system must provide in order to promote the

achievement of corporate goals. Complicated remote access solutions and their poor interaction with the firewall are counterproductive. In the worst case, the integration of an unsuitable combination even opens up loopholes for cybercriminals.

In order to counteract this and to prove both compatibility and security, the interaction of the two solutions was checked and matched perfectly during a long test phase. A seamless interaction of SparkView with the Hillstone NGFW was achieved. Users can thus rely on a thoroughly tested system and benefit from maximum security and compatibility, as well as high performance.

The remote access solution SparkView allows remote access via HTML5. SparkView works with any browser, no additional client software needs to be installed and it can be administered via one single central point. When using SparkView only screen content, pixels to be precise, are transmitted, so that all data stays where the user wants it:

in safety, completely ZTNA compliant.

About beyond SSL GmbH

beyond SSL focuses on consulting, marketing and sales of solutions related to connectivity, security and privacy. The company was founded by a team of specialists with many years of experience in various IT and management areas. In close cooperation with various product providers, currently RemoteSpark, TalariaX, FileCloud, ONLYOFFICE, and technology partners such as Fortinet, F5, Hillstone and Pulse Secure, beyond SSL and its partners support customers in all industries and of all sizes. We attach great importance to personal care and excellent support. Customers and partners benefit equally from a pre-selection of solutions with an excellent cost-benefit ratio.
