Technology alliance with F5

Same solution, same benefits: beyond SSL renewed their technology alliance with F5.

After 6 years on common paths, beyond SSL and F5 have renewed their alliance to deliver clientless remote access to desktops and applications from any device with a browser.

ZERO TRUST BEGINS WITH SECURE ACCESS TO ALL APPS

Whether from a public or private cloud, a mobile device, as a service, or on premises— applications can be located anywhere and accessed from everywhere, which, unfortunately, increases the corporate attack surface. F5 BIG-IP Access Policy Manager (APM) secures, simplifies and centralizes

access to apps, APIs and data, no matter where users and their apps are located.

The combination of SparkView from beyond SSL and F5 BIG-IP Access Policy Manager (APM), offers state of the art security and true BYOD capabilities at the same time. It enables zero-trust access for all apps, legacy and modern, with highly scalable identity and context-based access controls while software rollouts to client devices or installations on target systems are eliminated. There is no need to apply changes to BIG-IP APM security settings and functionality.

ZTNA taken a step further: ZTRA - Zero Trust Remote Access

The combination of SparkView and F5 BIG-IP APM is granting secure remote access without transferring data between the target system and the client devices at any time.

Leaving the data where it can be better „guarded" - in the company or in a cloud environment that can be controlled by the company - does not only simplify compliance tasks, but also secures data far more than if it were constantly exchanged with end devices.

About beyond SSL GmbH

beyond SSL focuses on consulting, marketing and sales of solutions related to connectivity, security and privacy. The company was founded by a team of specialists with many years of experience in various IT and management areas. In close cooperation with various product providers, currently RemoteSpark, TalariaX, FileCloud, ONLYOFFICE, and technology partners such as Fortinet, F5, Hillstone and Pulse Secure, beyond SSL and its partners support customers in all industries and of all sizes. We attach great importance to personal care and excellent support. Customers and partners benefit equally from a pre-selection of solutions with an excellent cost-benefit ratio.
